REC_DS using C_Week 7_COD_Question 1

Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1: Coding

1. Problem Statement

Ravi is building a basic hash table to manage student roll numbers for quick lookup. He decides to use Linear Probing to handle collisions.

Implement a hash table using linear probing where:

The hash function is: index = roll_number % table_sizeOn collision, check subsequent indexes (i+1, i+2, ...) until an empty slot is found.

You need to:

Insert a list of n student roll numbers into the hash table. Print the final state of the hash table. If a slot is empty, print -1.

Input Format

The first line of the input contains two integers n and table_size, where n is the

number of roll numbers to be inserted, and table_size is the size of the hash table.

The second line contains n space-separated integers — the roll numbers to insert into the hash table.

Output Format

The output should print a single line with table_size space-separated integers representing the final state of the hash table after all insertions.

If any slot remains unoccupied, it should be represented as -1.

Refer to the sample output for formatting specifications.

```
Sample Test Case
Input: 47
50 700 76 85
Output: 700 50 85 -1 -1 -1 76
Answer
#include <stdio.h>
#define MAX 100
void initializeTable(int table[], int size) {
  for(int i=0;i<size;i++)
    table[i]=-1;
int linearProbe(int table[], int size, int num) {
}
void insertIntoHashTable(int table[], int size, int arr[], int n) {
  intgi;
for( i=0;i<n;i++){
      int index=arr[i]%size
```

```
j=index;
            while(table[j]!=-1){
j=(j+1)\%size
              if(j==index){
                 return;
               }
            table[j]= arr[i];
          //table[j]= arr[i];
     }
for(int i=0;i<size;i++){
    printf("%d " table"
     void printTable(int table[], int size) {
          printf("%d ",table[i]);
        }
     int main() {
        int n, table_size;
        scanf("%d %d", &n, &table_size);
        int arr[MAX];
        int table[MAX];
                                                           240801238
        for (int i = 0; i < n; i++)
          scanf("%d", &arr[i]);
        initializeTable(table, table_size);
        insertIntoHashTable(table, table_size, arr, n);
        printTable(table, table_size);
        return 0;
     }
                                                                                 Marks: 10/10
     Status: Correct
